Hello I’m

Suman Kanti Roy

Senior Product Designer (UI/UX)

About My Journey

UX professional with 12+ year of experience shipping easy-to-use, research-driven, user-centric products and enterprise solutions. My background is a unique blend of science and fine arts, which shapes how I approach design with clear thinking and aesthetic precision. I believe good design brings people together, It turns friction into flow and frustration into connections.

Experience & Background

Usability Design Engineer
Lexmark International India Pvt. Ltd.
17 Jan 2022 - 14 Nov 2025

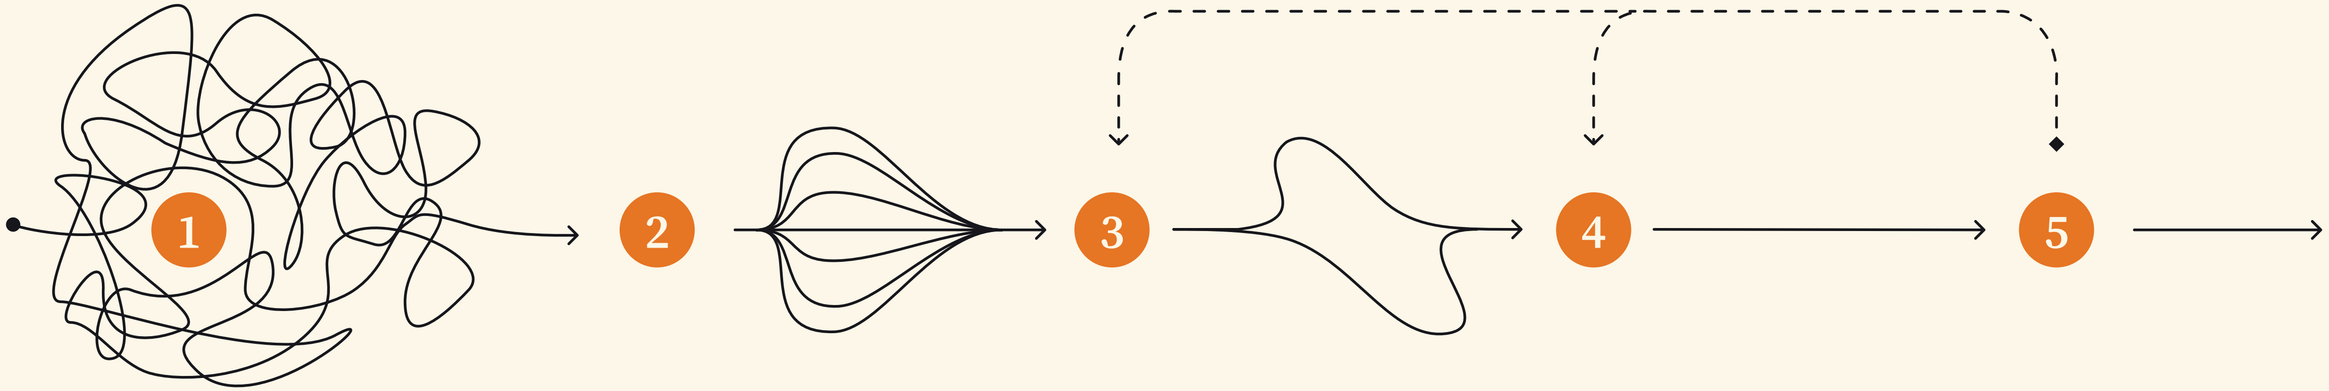
  ### Bachelor Of Science
  Maharaja Bir Bikram College, Tripura University

Certification

- IIT Guwahati – May 2024
  ### NPTEL Usability Engineering
- IIM Bangalore – Dec 2023
  ### Effective Business Communication

My Design Process



1. Finding Frictions
2. Framing Problems
3. Shaping Solution
4. Usability Testing
5. Design Iteration

Skills & Expertise

Design Softwares

- Figma
- Adobe XD
- Photoshop
- Illustrator
- InDesign
- Affinity

Research Tools

- Miro
- Maze
- Strak
- UserTesting
- NotebookLM

AI & Frontend

- HTML-5 & CSS-3
- JavaScript
- Bootstrap
- Vibe Coding
- Agentic UI Design

Featured Projects # 1

Omni P3

Retail Warehouse Operation

Streamlined retail warehouse workflows through intelligent automation and UX decisions that connect user, data, and daily store operational works.

Problem

Outdated batch management lead to delayed orders and reprint mismatches. Poor inventory visibility and frequent stockouts & High operational costs due to reprinting delays (10% impact).

Solution

Implemented a mobile-first dashboard using Figma, React, and Flutter. Streamlined primary tasks such as creating/editing signages and boosting social ads.

Results

- Reduced clutter, quick completion via scanning or typing.
- Business Impact: Initially targeted 25% increase in adoption and 25% reduction in drop-offs.

Open Prototype

Duration: 24 weeks • 2025

Featured Projects # 2

AutoCare

Smart Automobile Service

End-to-end automobile service experience unifying consumers, technicians, and business needs into a single platform to reduce fragmented touch points.

Problem

Consumers are often unorganised and forget to track regular car maintenance. Technicians face productivity issues. Garage owners struggle with overdue payments and consumer complaints.

Open Prototype

Solution

Developed a tripartite platform for Consumers, Technicians, and Garage owners (Dealers). Features like Smart scheduling, expense analytics, performance scores, and real-time navigation.

Results

- Improve communication channel via chat support and live notifications.
- Implemented QR code verification and integrity validation.
- Business metrics, auto-invoicing.

Duration: 06 months • 2021

Featured Projects # 3

Pro PrintAR

Integrated Augmented Reality

AR-driven printing platform designed for real-time visualisation, smart print management, and faster troubleshooting within modern office environments.

Problem

Routine maintenance relies on dense, confusing text-heavy PDF manuals.
High volume of IT support tickets for simple tasks like toner replacement.
Unable to find available printers near by.

Solution

Spatial displays real-time "Printer Health" (e.g., toner levels) as 3D bars floating over the machine.
Replaces manuals with 3D overlays that highlight specific action to perform.

Results

- Zero IT Intervention to resolved in minutes by employees.
- Zero time wasted searching printer.
- Encourage interact with complex hardware independently.

Open Prototype

Duration: 04 weeks • 2022

Award & Achievements

Lexmark CTO Excellence Award - 2022
