Hello I'm

Suman Kanti Roy

Senior Product Designer & UX Consultant

I shape business ideas and complex human needs into intuitive, enjoyable and scalable solutions. With 12+ years of experience across enterprise platforms and digital products in retail, fintech, Oil & energy, & healthcare. I focus on improving usability, simplifying interactions, streamlining workflows, and delivering measurable outcomes. With a background in both science and fine arts, I bring together analytical thinking and creativity to design solutions that solve real-world problems.

" I believe a good design brings people together, transforming friction into flow and frustration into connection."

Professional Career

Usability Design Engineer
Lexmark International India Pvt. Ltd.
17 Jan 2022 - 14 Nov 2025

User Experience Designer
Wipro Technologies Limited
17 Mar 2017 - 15 Jan 2022

Graphic UI & UX Designer
Rxprism Health Systems Pvt. Ltd.
11 Mar 2015 - 15 Mar 2017

Graphic & Web Designer
Hibu India Pvt. Ltd.
06 Jan 2014 - 20 Feb 2015

Education

Bachelor Of Fine Art
Govt. College of Art & Craft, Tripura University • 2006 – 2010

Bachelor Of Science
Maharaja Bir Bikram College, Tripura University • 2003 – 2006

Certification

Effective Business Communication
IIM Bangalore – Dec 2023

NPTEL Usability Engineering
IIT Guwahati – May 2024

Skills & Expertise

Tools Proficiency

- Figma AI, Adobe XD
- Adobe Photoshop
- Adobe Illustrator
- Adobe InDesign
- Affinity
- Google Stitch

Design Competency

- UX Strategy & Planning
- Interaction Design
- Wireframe & Prototyping
- Information Architecture
- Heuristic Evaluation
- User Journey Mapping
- Data Visualisation

Research & Collaboration

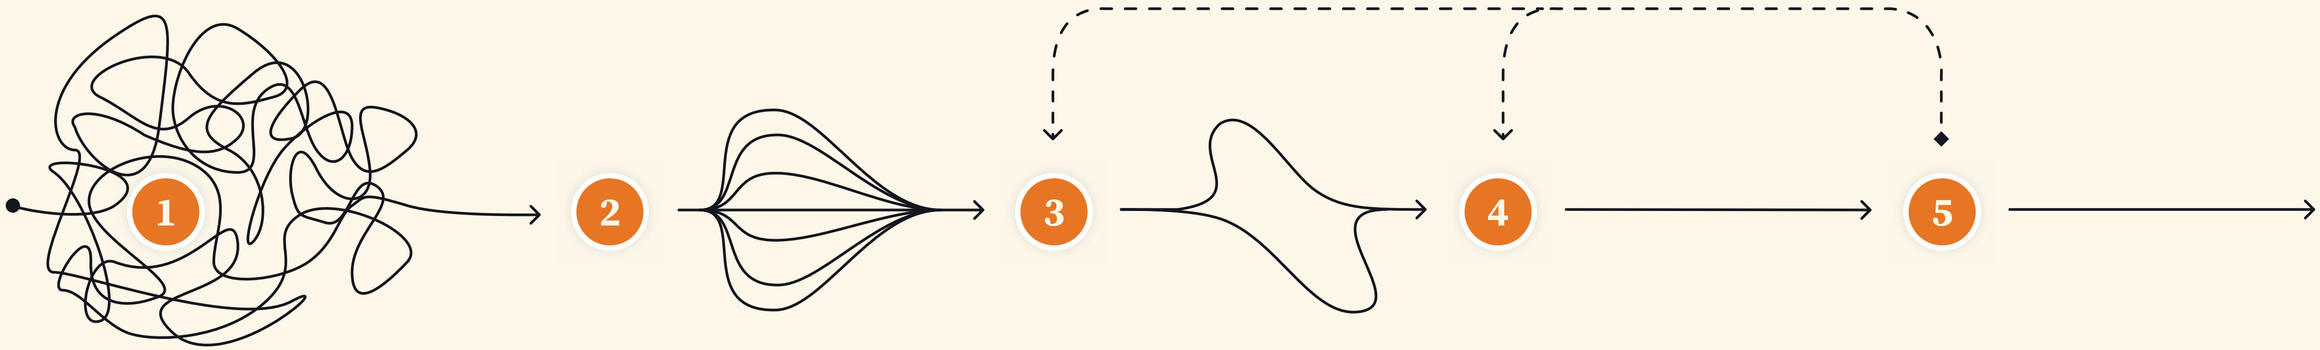
- UX Research & Audit
- User Interview
- NotebookLM
- AI-Assisted Writing
- Prompt Engineering
- Maze & Stark

Frontend & AI Technology

- HTML-5, CSS-3
- JavaScript (Basic)
- Vibe Coding
- Google Antigravity
- GitHub Copilot
- Claude Design

Design Process

I begin by untangling complexity knots, uncovering hidden frictions, and precisely framing problems. I then shape and validate ideas against business, tech, and user needs, lastly iterating until concepts become scalable, build-ready solutions.



Finding Frictions

Framing Problems

Shaping Solutions

Quality Iteration

Project Samples 1

Omni P3

Retail Warehouse Operation

Streamlining retail back-office workflows through intelligent automation and strategic UX, bridging the gap between complex data and daily warehouse operations to align inventory accuracy with real-time demand.

Context

- Poor batch & inventory visibility.
- Outdated batch handling system.
- High reprinting operational cost.
- Frequent stockouts in showroom.

Action

- Streamlined quick tasks by scanning.
- Cleaner dashboard for all user group.
- Mobile-first approach rush hours.
- Boosting all batches print & publish.
- Implemented Figma, React & Flutter.

Results

- Reduced clutter, show only essentials.
- Increase productivity by 10% ~ 15%.
- Archived targeted adoption 25%.
- More 20% customer engagements.

Watch Video

Duration: 24 weeks • 2024-25

Project Samples 2

PrintAR

Augmented Reality Platform

AR-driven platform designed for real-time virtual augmentation and smart print management. It delivers a high-velocity user experience through self-solving workflows, eliminating IT intervention and navigation.

Context

- Confusing text-heavy PDF manuals.
- Unable to find available printers.
- High volume of IT support tickets.
- Fixing and reactive maintenance.

Action

- Replace manual to 3D demonstration.
- Displays real-time "Printer Health".
- Navigate user to device destination.
- AR powered self trouble shooting.

Results

- Zero IT intervention to error resolved.
- Zero time wasted searching printer.
- Encourage hardware interactivity.
- LEX adherent privacy compliance.
- Predictive on demand notifications.

Watch Video

Duration: 6 weeks • 2022-23

Project Samples 3

VeloCare

Automobile Service Application

End-to-end automobile service experience unifying consumers, technicians & garage owners into a single platform to reduce fragmented touch points. It eliminates operational silos and business friction, ensuring peak productivity.

Context

- Forget routine maintenance.
- Unauthorised services taken.
- Technicians face productivity issues.
- Less transparency during repairs.
- Dealer-end inconsistent revenue.

Action

- Unified bookings and scheduling.
- Sends prior maintenance reminders.
- Live repair tracking for trust building.
- Provide rewards and incentives.
- Automates invoicing and payments.

Results

- Direct communication channel.
- QR code 45% faster processing time.
- Auto-invoicing & generate reports.
- 8% improvement diagnosis accuracy.

Watch Video

Duration: 03 months • 2021

Key Achievement

Lexmark CTO Excellence Award - 2022
