

Hello I'm Suman Kanti Roy

Senior Product Designer & UX Consultant

I shape business ideas and complex human needs into intuitive, enjoyable and scalable solutions. With 12+ years of experience across enterprise platforms and digital products in retail, fintech, Oil & energy, & healthcare. I focus on improving usability, simplifying interactions, streamlining workflows, and delivering measurable outcomes. With a background in both science and fine arts, I bring together analytical thinking and creativity to design solutions that solve real-world problems.

"I believe a good design brings people together, transforming friction into flow and frustration into connection."

Professional Career

- Usability Design Engineer
Lexmark International India Pvt. Ltd.
17 Jan 2022 - 14 Nov 2025
- User Experience Designer
Wipro Technologies Limited
17 Mar 2017 - 15 Jan 2022
- Graphic UI & UX Designer
Rxprism Health Systems Pvt. Ltd.
11 Mar 2015 - 15 Mar 2017
- Graphic & Web Designer
Hibu India Pvt. Ltd.
06 Jan 2014 - 20 Feb 2015

Education

Bachelor Of Fine Art

Govt. College of Art & Craft, Tripura University • 2006 – 2010

Bachelor Of Science

Maharaja Bir Bikram College, Tripura University • 2003 – 2006

Certification

Effective Business Communication

IIM Bangalore – Dec 2023

NPTEL Usability Engineering

IIT Guwahati – May 2024

Skills & Expertise

Design Competency

- Interaction Design
- Wireframe & Prototypes
- Information Architecture
- Heuristic Evaluation
- User Journey Mapping
- Data Visualisation
- UX Strategy & Planning

Tools & Technology

- Figma, Adobe XD
- Photoshop, Illustrator
- Affinity, InDesign
- Google Antigravity
- Lovable, Framer
- Miro, FigJam

Functional UX Research

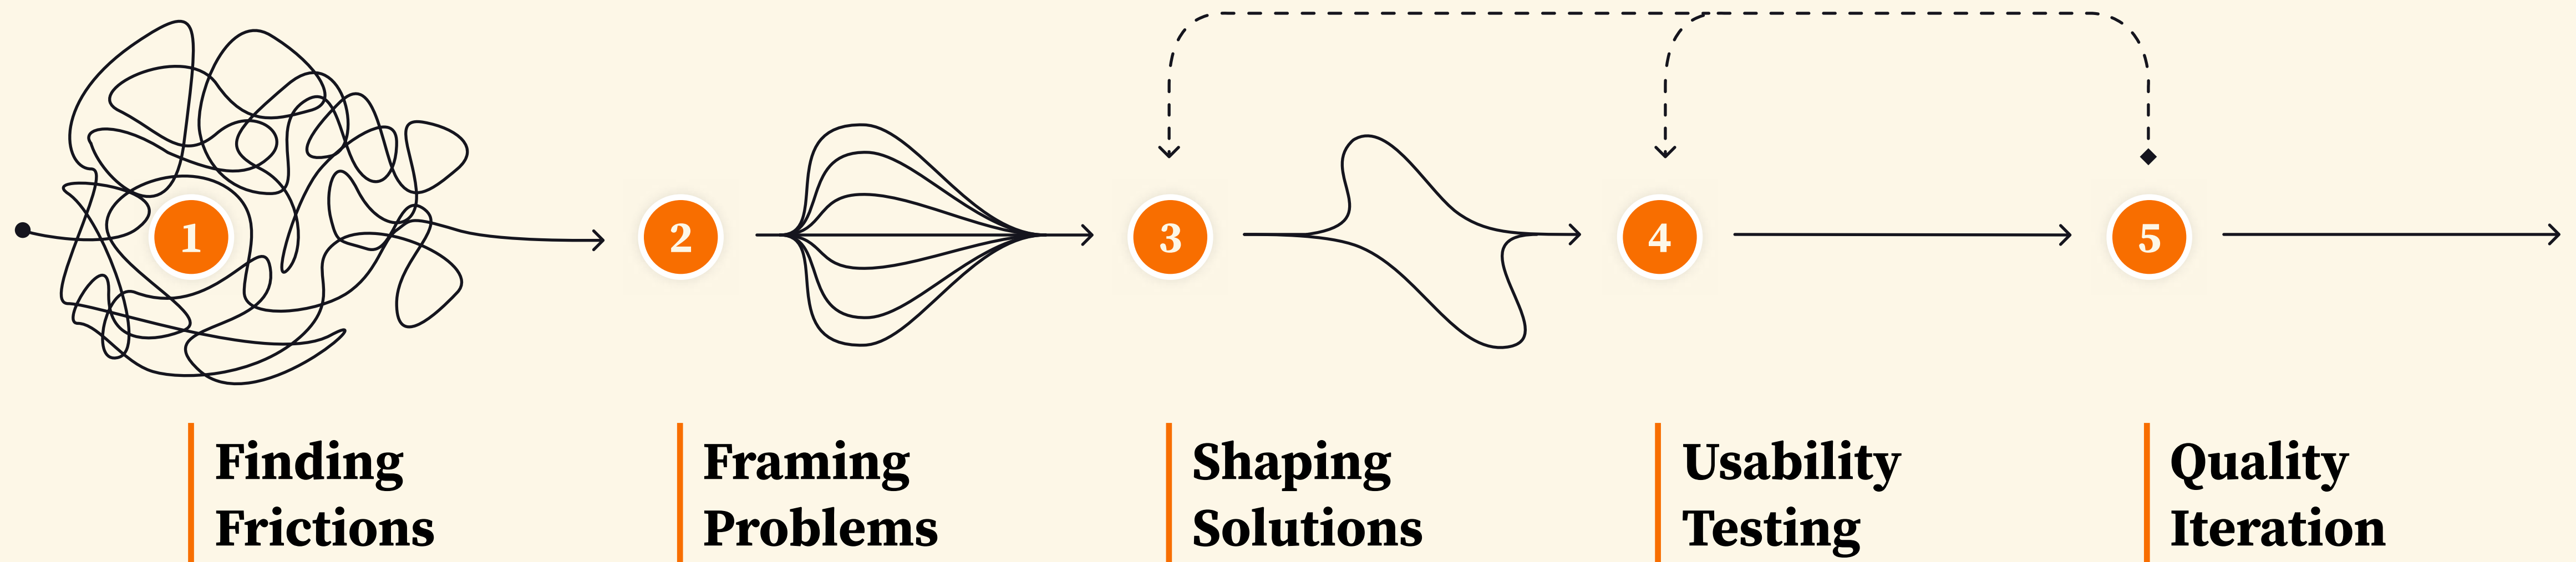

- User Research & Audit
- Interview & Survey
- Maze Usability
- Stark Accessibility
- Google NotebookLM
- Claude Design Pro

Frontend & AI Proficiency

- HTML, CSS
- JavaScript
- Vibe Coding
- Agentic Iteration
- Prompt Engineering
- Conversational AI

Design Process

I begin by untangling complexity knots, uncovering hidden frictions, and precisely framing problems. I then shape and validate ideas against business, tech, and user needs, lastly iterating until concepts become scalable, build-ready solutions.

Project Samples 1

Omni P3

Retail Warehouse Operation

Streamlining retail back-office workflows through intelligent automation and strategic UX, bridging the gap between complex data and daily warehouse operations to align inventory accuracy with real-time demand.

🎯 Context

- Poor batch & inventory visibility.
- Outdated batch handling system.
- High reprinting operational cost.
- Frequent stockouts in showroom.

🔗 Action

- Streamlined quick tasks by scanning.
- Cleaner dashboard for all user group.
- Mobile-first approach rush hours.
- Boosting all batches print & publish.
- Implemented Figma, React & Flutter.

📈 Results

- Reduced clutter, show only essentials.
- Increase productivity by 10% ~ 15%.
- Archived targeted adoption 25%.
- More 20% customer engagements.

Duration: 24 weeks • 2024-25

Project Samples 2

PrintAR Augmented Reality Platform

AR-driven platform designed for real-time virtual augmentation and smart print management. It delivers a high-velocity user experience through self-solving workflows, eliminating IT intervention and navigation.

🎯 Context

- Confusing text-heavy PDF manuals.
- Unable to find available printers.
- High volume of IT support tickets.
- Fixing and reactive maintenance.

🔧 Action

- Replace manual to 3D demonstration.
- Displays real-time "Printer Health".
- Navigate user to device destination.
- AR powered self trouble shooting.

📈 Results

- Zero IT intervention to error resolved.
- Zero time wasted searching printer.
- Encourage hardware interactivity.
- LEX adherent privacy compliance.
- Predictive on demand notifications.
